

# Software Requirements Specification (SRS)

*Project Title: Movie Explorer Portal (Static Web Design)*

|                  |                                                   |
|------------------|---------------------------------------------------|
| Project Title    | Movie Explorer Portal                             |
| Target Audience  | B.Tech. 1st Year Students (Web Designing Subject) |
| Technology Stack | HTML5, CSS3, Bootstrap 5 / Tailwind CSS           |
| Scope Limit      | Static Web Pages                                  |

## 1. Introduction

### 1.1 Purpose

This Software Requirements Specification (SRS) establishes the complete structural, layout, and presentation requirements for the Movie Explorer Portal project. Tailored specifically for B.Tech 1st Year students enrolled in Web Designing / Web Technologies courses, this document guides the construction of a multi-page static web application using pure HTML5, CSS3, and Bootstrap 5 / Tailwind CSS without requiring client-side logic programming or external database integration.

### 1.2 Scope

The project focuses on mastering client-side presentation layer fundamentals. The scope includes:

- **Semantic Markup Structure:** Constructing clean HTML5 pages using semantic tags (<header>, <nav>, <main>, <section>, <article>, <footer>).
- **Responsive Layout Architecture:** Utilizing Bootstrap 5 12-column flexbox grid system to create fluid layouts across mobile, tablet, and desktop viewports.
- **Custom CSS3 Aesthetics:** Applying custom typography, color palettes, box-shadow depth, and hover transitions.
- **Multi-Page Navigation:** Creating persistent navbar headers connecting Home, Catalogue, Details, and About pages.
- **UI Component Integration:** Utilizing Bootstrap utility components such as Navbars, Cards, Badges, Carousels, and HTML Form controls.

## 2. Overall Description

### 2.1 Technology Stack & Constraints

The project strictly restricts technologies to core web design frameworks suited for 1st-year students:

- **Mandatory Technologies:** HTML5, CSS3, Bootstrap 5 (or Tailwind CSS CDN).
- **Prohibited Technologies:** JavaScript (ES6/jQuery/React), REST APIs, LocalStorage/SessionStorage, Backend Server Languages (Node, PHP, Python).

## 2.2 Page Structure Overview

| Page File    | Layout Components & Design Objective                                                                                              |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------|
| index.html   | Home Page featuring a sticky Navbar, Hero Section Banner, Spotlight Movie Cards Grid, Quick Category Badges, and Footer.          |
| movies.html  | Movie Catalogue Page featuring Filter Category Buttons, Search Bar mockup, Multi-column Responsive Movie Grid, and Pagination UI. |
| details.html | Movie Details Page displaying large poster showcase, metadata badges, cast list, plot synopsis, and static review cards.          |
| about.html   | About & Contact Page highlighting project info, developer credits, and a styled HTML Feedback Contact Form with input fields.     |

## 3. Functional Presentation Requirements

### FR-1: Navigation Bar Component

**Requirement:** A persistent sticky navigation bar across all HTML pages containing brand logo and active page highlights.

### FR-2: Responsive Cards Grid

**Requirement:** Multi-column responsive card grid (4 cols on Desktop, 2 cols on Tablet, 1 col on Mobile) displaying film posters, titles, ratings, and year tags.

### FR-3: Hero Banner / Carousel

**Requirement:** Visually appealing hero section banner or image slider introducing the portal on the index.html landing page.

### FR-4: Movie Details Layout

**Requirement:** Dedicated details.html page showcasing high-resolution movie imagery, cast list badges, synopsis text, and movie spec tables.

### FR-5: Form UI Layout

**Requirement:** A styled contact form on about.html containing input fields for Name, Email, Subject, Message, and a Submit button.

## 4. Academic Evaluation Rubric (100 Marks)

| Evaluation Criterion     | Weightage | Key Focus Area                                                                                               |
|--------------------------|-----------|--------------------------------------------------------------------------------------------------------------|
| HTML5 Semantic Structure | 20 Marks  | Proper usage of semantic tags (<header>, <nav>, <main>, <article>), clean indentation, image alt attributes. |

| Evaluation Criterion             | Weightage | Key Focus Area                                                                                               |
|----------------------------------|-----------|--------------------------------------------------------------------------------------------------------------|
| CSS3 Custom Styling & Aesthetics | 20 Marks  | Typography hierarchy, custom CSS variables, hover transitions (transform: translateY), card shadows.         |
| Bootstrap 5 Grid & Utilities     | 25 Marks  | Effective 12-column grid layout (container, row, col-md-4), clean usage of Bootstrap cards, buttons, badges. |
| UI/UX Design & Layout Balance    | 15 Marks  | Visual alignment, color contrast, margin/padding consistency, intuitive navigation across pages.             |
| Responsive Mobile-First Layout   | 10 Marks  | Flawless mobile, tablet, and desktop layout reflow without horizontal scrolling clipping.                    |
| Code Quality & Organization      | 5 Marks   | Clean folder structure, clean style sheet organization, inline CSS comments.                                 |
| Viva Defense & Demo              | 5 Marks   | Student's ability to explain HTML tags, CSS box model properties, and Bootstrap utility classes.             |

## 5. 12-Week Detailed Execution Plan

| Week                                      | Topic / Phase          | Key Student Activities                                                 | Deliverable          |
|-------------------------------------------|------------------------|------------------------------------------------------------------------|----------------------|
| Week – 1<br>(10-08-2026<br>to 16-08-2026) | HTML Basics & Setup    | Setup VS Code, HTML boilerplate structure, basic text and image tags   | Basic Skeleton       |
| Week – 2<br>(17-08-2026<br>to 23-08-2026) | Semantic HTML5         | Structure pages using header, nav, main, section, article, footer tags | HTML Wireframes      |
| Week – 3<br>(17-08-2026<br>to 23-08-2026) | CSS Box Model & Colors | Apply custom colors, fonts, margins, padding, and borders              | Styled Static Layout |
| Week – 4<br>(24-08-2026<br>to 30-08-2026) | Flexbox & Grid Layouts | Build multi-column grid layouts using pure CSS flexbox and grid        | Multi-column View    |

| Week                                                                                                                                              | Topic / Phase                           | Key Student Activities                                                                   | Deliverable          |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|------------------------------------------------------------------------------------------|----------------------|
| <b>Phase-1 Evaluation</b><br><b>Review HTML5 semantic standards, CSS box model, and layout structure</b><br><b>(07-09-2026 to 18-09-2026)</b>     |                                         |                                                                                          |                      |
| Week – 5<br>(07-09-2026 to 13-09-2026)                                                                                                            | Bootstrap 5 Setup                       | Link Bootstrap CDN, practice 12-column grid system (container, row, col)                 | Bootstrap Grid Shell |
| Week – 6<br>(14-09-2026 to 20-09-2026)                                                                                                            | Bootstrap Components                    | Implement Navbar, Cards, Badges, Buttons, and Carousels                                  | Component Assembly   |
| Week – 7<br>(14-09-2026 to 20-09-2026)                                                                                                            | Multi-Page Assembly                     | Assemble index.html, movies.html, details.html, and about.html                           | Full Website Pages   |
| <b>Phase-2 Evaluation</b><br><b>Assess Bootstrap integration, UI design quality, and visual alignment</b><br><b>(21-09-2026 to 2-10-2026)</b>     |                                         |                                                                                          |                      |
| Week – 8<br>(21-09-2026 to 27-09-2026)                                                                                                            | Custom CSS & Transitions                | Add card hover effects, custom shadows, CSS variables, and badge styles                  | Polished UI Design   |
| Week – 9<br>(28-09-2026 to 04-10-2026)                                                                                                            | Responsive Audit & QA                   | Test layouts across mobile, tablet, and desktop screens; adjust breakpoints              | Responsive Project   |
| Week – 10<br>(05-10-2026 to 11-10-2026)                                                                                                           | Make All page professionally attractive | Test your web pages look and feel, change the color of font, background, etc., if needed | Test Look & Feel     |
| <b>Phase-3 Final Viva</b><br><b>Final project submission, code defense viva, and presentation assessment</b><br><b>(12-10-2026 to 23-10-2026)</b> |                                         |                                                                                          |                      |
